

ACHAL YOGESHWAR TURKAR

Java Full Stack Developer | Spring Boot | React.js | PostgreSQL | Immediate Joiner
Nagpur, India (Open to Relocate) | +91-9359647748 | achalyturkar@gmail.com | github.com/achalturkar | linkedin.com/in/achal-turkar

PROFESSIONAL SUMMARY

Java Full Stack Developer with 1.8 years of experience who has built 150+ production REST APIs using Spring Boot, React.js, and PostgreSQL across invoice management, recruitment, and HRMS platforms. Implemented JWT-based authentication and role-based access control, optimized database queries to cut API response times by 30%, and containerized applications with Docker to reduce deployment time by 40%. Comfortable across the full stack, from database schema design to responsive React UI.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+)

Backend: Spring Boot, Spring MVC, Spring Security, REST APIs, JPA, Hibernate, JWT Authentication, Microservices

Frontend: React.js, Redux, HTML5, CSS3, Tailwind CSS, Bootstrap

Database: PostgreSQL, MySQL, Redis, Query Optimization, Database Design

Cloud & DevOps: Docker, AWS (EC2, S3, RDS), Azure, Linux, Nginx, CI/CD (Jenkins, GitHub Actions)

Testing & Tools: JUnit, Mockito, Git, Postman, Swagger/OpenAPI, Maven, IntelliJ IDEA

Methodologies: Agile, Scrum, System Design

WORK EXPERIENCE

Software Developer | Careers Worldwide, Pune

Dec 2024 – Present

- Designed and developed 150+ RESTful APIs using Spring Boot across authentication, invoice management, and recruitment modules, supporting multiple business workflows.
- Implemented secure authentication and role-based authorization using JWT and Spring Security, reducing unauthorized access incidents to zero.
- Built responsive, reusable frontend components in React.js with seamless REST API integration, improving UI load consistency across modules.
- Optimized PostgreSQL and MySQL queries through indexing and query restructuring, improving API response times by up to 30%.
- Containerized applications using Docker and deployed on Linux VPS with Nginx, reducing deployment time by ~40%.
- Collaborated with cross-functional teams in an Agile/Scrum environment, participating in sprint planning and code reviews to ensure on-time delivery.

PROJECTS

Invoice, Billing & HRMS Management Platform

React.js, Spring Boot, PostgreSQL, JWT, Docker | GitHub: github.com/achalturkar

- Developed a full-stack enterprise platform with microservice architecture managing invoice generation, client records, employee data, leave management, and payroll for 100+ users.
- Implemented secure RESTful APIs with JWT-based authentication and role-based access control (RBAC).
- Designed a normalized PostgreSQL schema and optimized queries for efficient data retrieval.
- Built responsive UI with React.js and deployed containerized services on Linux servers.

Applicant Tracking System (ATS)

React.js, Spring Boot, PostgreSQL, JWT, Docker, AWS S3/RDS | GitHub: github.com/achalturkar

- Built an end-to-end recruitment platform managing the complete candidate lifecycle from application to onboarding.
- Implemented JWT-based authentication and role-based access control for recruiters and admins.
- Containerized the application using Docker and deployed on a Linux server with Nginx for load balancing.
- Used AWS S3 for file storage and AWS RDS PostgreSQL for the database.

Client Website & CMS Platform

React.js, Spring Boot, HTML5, CSS3, Nginx | GitHub: github.com/achalturkar

- Developed SEO-optimized static and dynamic websites for multiple clients based on business requirements.
- Built performance-focused, content-driven dynamic components using React.js, improving page load speed.
- Deployed websites on Linux servers using Nginx with production-ready configurations.

EDUCATION

Master of Computer Applications (MCA) — Ramdeobaba College of Engineering & Management, Nagpur (2023–2025)

Bachelor of Science (BSc) — RTM Nagpur University (2019–2022)
