PROFESSIONAL SUMMARY

Java Full Stack Developer with 1.6+ year of experience building scalable web applications using Spring Boot, React.js, and PostgreSQL. Experienced in designing RESTful APIs, implementing secure authentication using JWT and Spring Security, and developing enterprise backend systems. Skilled in database design, API performance optimization, and containerized deployments using Docker, Nginx, and Linux environments.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+)

Backend: Spring Boot, Spring MVC, Spring Security, REST APIs, JPA, Hibernate, JWT Authentication, Microservice

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Database: PostgreSQL, MySQL, Query Optimization, Database Design

DevOps: Docker, Linux, Nginx, VPS Deployment, Azure

Tools: Git, GitHub, Postman, Swagger/OpenAPI, Maven, IntelliJ IDEA, VS Code

Methodologies: Agile, Scrum

WORK EXPERIENCE

Software Developer | Careers Worldwide Pune

Dec 2024 – Present

- Designed and developed **RESTful APIs using Spring Boot** for multiple business modules including authentication, invoice management, and recruitment systems.
 - Implemented secure **authentication and authorization using JWT** and Spring Security.
 - Developing responsive frontend interfaces using **React.js with REST API integration**.
 - Optimized **PostgreSQL and MySQL** queries to improve API response time and overall application performance.
 - Containerized applications using **Docker** and deployed services on Linux VPS servers with Nginx.
 - Collaborated with cross-functional teams in Agile environment to deliver scalable web applications.
-

PROJECTS

Invoice, Billing & HRMS Management Platform

Tech: React.js, Spring Boot, PostgreSQL, Postman, Swagger

- Developed a **full-stack enterprise platform** to manage invoice generation, client management, employee records, leave management, and payroll operations.
- Designed and implemented secure **RESTful APIs using Spring Boot with JWT-based authentication and role-based access control**.
- Designed relational database schema using **PostgreSQL and optimized queries** for efficient data retrieval.
- Built responsive user interfaces using **React.js REST API integration** and deployed containerized applications on Linux servers.

Applicant Tracking System (ATS)

Tech: React.js, Spring Boot, PostgreSQL, JWT, Docker

- Built an end-to-end recruitment system to manage the candidate lifecycle
- Implemented JWT-based authentication and role-based access control
- Containerized application using Docker and deployed on Linux server with Nginx

Client Website & CMS Platform

Tech: React.js, Spring Boot, HTML5, CSS3, SEO, Nginx

- Developed static and dynamic websites for multiple clients based on business requirements
 - Built **SEO-optimized** and performance-focused web pages
 - Implemented content-driven dynamic components using React.js
 - Deployed websites on Linux servers using Nginx
-

EDUCATION

Master of Computer Applications (MCA) | 2023 – 2025

Bachelor of Science (BSc) | 2019 – 2022
